1930/31

SUNNY SLOPE FRUIT FARM

Special Notice

RECEIVED

JAN 10 1931 ★

Due to the fact that we have some 8,000 copies of last seasons price list on hand and rather than destroy we are adding our prices for fall of 1930 and spring 1931. The prices we are quoting here are considerable higher than last season which is caused by the drouth of last Summer, which was the most severe that we have had in the past fifty years. There is not 50 per cent of a normal plant crop in our State and for this reason we are forced to ask more for our plants. The quality is fine and you cannot buy better plants at any price than we are now offering.

Again thanking you one and all for the many past orders sent us and trusting to again receive your order this season. We are,

Yours very truly,
WALLER BROS.

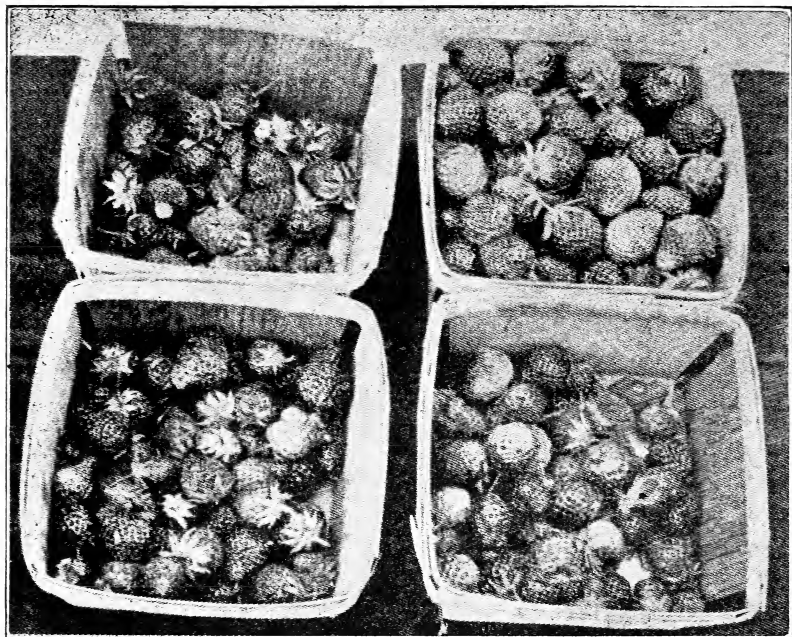

Price List

	Post Paid	Not Paid	Not Paid	Not Paid
Variety	100	250	500	1,000
Imp. Klondike	\$1.00	\$1.25	\$2.00	\$ 3.50
Excelsior	1.00	1.25	2.00	3.50
Missionary	1.00	1.25	2.00	3.50
Lady Thompson	1.00	1.25	2.00	3.50
Senator Dunlap	1.00	1.25	2.00	3.50
Dr. Burrill	1.00	1.25	2.00	3.50
Gandy	1.00	1.25	2.25	4.50
Aroma	1.00	1.25	2.25	4.50
Evening Star	1.00	1.25	2.50	4.50
St. Louis	1.00	1.25	2.50	4.50
Kelloggs Premier	1.00	1.25	2.50	4.50
Ruth Early	1.00	1.25	2.50	4.50
Pearl	1.00	1.25	2.50	4.50
Blakemore	1.50	3.00	5.50	10.00
Progressive	1.50	2.50	5.00	9.00
Mastodon	2.00	4.25	7.00	13.00

Evergreens

We are now offering Bakers, Excelsa and Chinese Evergreens in sizes 3 to 3½ ft. Price \$2.00.

Blakemore

Two baskets at left, first picking of Missionary strawberries; two baskets at right, first picking of Blakemore. Upper baskets contain No. 1 grade berries; lower baskets, culls and small berries. At this first picking, from equal lengths of adjacent rows, Blakemore produced four times as much No. 1 grade fruit as the Missionary and fewer culls.

The Blakemore strawberry originated from a cross of the Missionary X Howard 17 or Kellogg's Premier. It comes highly recommended by the Department of Agriculture, Washington, D. C.

The Blakemore is a tarty berry of the Missionary type with foliage more resistant to disease than either parent plant. According to the Department of Agriculture. It is a finer berry than either parent, but inherits its firmness from the Missionary. In hot moist weather it does not puff and become soft as do the Howard. Berries of the new variety are of a bright-red color, which is derived from the Howard and unlike most varieties does not turn dark on holding, which makes this variety a great favorite. Like the Missionary it grows well during the short days of winter and spring in the

SUNNY SLOPE FRUIT FARM

south. They say 90 per cent of the fruit will number one grade. The berry is highly recommended through the south or in all sections where Klondike and Missionary are grown.

We are very anxious that our many customers give this variety a trial. We have great faith in it and am sure you will find it to be a winner.

Youngberry

This is a grand new fruit; one we think it will pay you to try. They are hummers. They have made yields of 20,000 pints to the acre in California, and have made big yields in Alabama and Georgia. We have fruited them this last spring on a small scale and we find them very fine.

Berries run about an inch long; are of purple color and have a very fine flavor and are very productive. When you eat them you think you have a nice, ripe, Red Raspberry instead of a dewberry. The vines grow very robust and make vines from 10 to 20 feet long in a season and are very hardy.

We have reports where they have withstood 20 below zero in the north.

The one planting will last a lifetime. You need not set every few years, but cut out dead wood each year and next season pick another big crop of fine fruit. We have never told our patrons to plant anything if we did not consider it a good buy. We think enough of this berry to have set out eight acres of them, and we expect to increase our planting this coming spring.

Don't fail to set at least a few of them.

Season is in June with us; just a few weeks after the strawberry crop comes off.

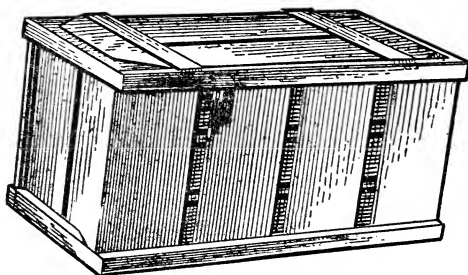

In south Alabama they have cleared from \$550.00 to \$650.00 per acre from them. In California, as high as \$1,000.00 per acre.

Better try them and get in on the ground floor. We price them in lots from one dozen up to 1,000. We hope to have your orders. Youngberry plants, post paid; doz., \$1.50; 50, \$5.00; 100, \$8.00. By express collect: 500, \$27.50; 1,000, \$50.00.

Cultivation of the Youngberry is no more difficult than any other vining berry. Best results are obtained by planting six to seven feet apart in rows and with the rows about eight feet apart. A two-wire trellis four feet high will be covered when one year old. Only a moderate amount of moisture is necessary for a successful growth.
